

PROJECT EXPEDITING SERVICES

“20 YEARS INDUSTRY EXPERIENCE” HOW WE ADD VALUE TO A PROJECT

- Conduct all quality inspections and reporting
- Carry out random dimensional checks as per shop drawings
- Address all technical queries via engineering and / or shop detailers .
- Verify and report that all manufacturing meets the requirements of the specifications and standards
- Verify that surface treatment meets the requirements of the specification and standards.
- Verify NDT of welds meets the level specified.
- Verify trial assemblies/fit up and alignment.
- Compile photographic records of manufacturing and surface treatment .
- Monitor and report on progress against program.
- Control and compile all logistics reports between the manufacturer and the construction team .
- Ensure all quality documentation is maintained and delivered in accordance with the contract.
- Report on any commercial concerns that may impact on delivery.

STRUCTURAL AND MECHANICAL

WHAT OUR CLIENTS ARE SAYING

“We engaged Steelink because we knew they had many years of heavy manufacturing experience. They expedited very tight structural and mechanical programs and ensured that the quality was consistent from end to end, the project was completed 2 months ahead of schedule” (Laing O’Rourke Australia, Airly Coal Project NSW - 800 tonne coal handling facility for Centennial Coal)

“Steelink added real value to the delivery of our project, they gave us accurate reports and ensured the quality and progress of the Bridge was maintained, the bridge was successfully installed and we have a very happy client” (YORK CIVIL SA - Emmaus Foot Bridge Rockhampton for Main Roads QLD)

WHAT OUR CLIENTS ARE SAYING

“Steelink gave us the advantage of their experience and knowledge of the industry. They recommended key suppliers and contractors - including drafters, painters and erectors; this helped us make our decisions and led to the successful execution of our contracts” (PPW Steel, Over Height Barrier, North South by Pass Tunnel - for Main Roads QLD)

“We contracted Steelink to give us an objective assessment of our preferred subcontractor’s scopes of works and their capability of maintaining the programs and quality, we found their assessments realistic and we based our selection and management of the subcontractors on this advice” (EPCM – Procurement - SEQ)
